## COVID-19

On March 11, 2020, the World Health Organization declared the rapidly spreading coronavirus disease (COVID-19) outbreak a pandemic. Subsequently, all of the jurisdictions in which Dollarama operates imposed increasingly strict measures in an attempt to slow the transmission of the virus, including travel restrictions, self-isolation measures, mandatory closures of non-essential services and businesses, and physical distancing practices. Similar measures have been taken in the countries of operation of Dollarcity. The Corporation has implemented mitigation strategies and contingency plans in response to this rapidly-evolving situation and is closely monitoring the impact on its supply chain and operations in Canada and Latin America.

The Corporation has been recognized as an essential business in its Canadian markets and is committed to maintaining its stores well-stocked with affordable everyday products and offering the same compelling value proposition to its Canadian customers. The Corporation has implemented several preventive measures to protect the health and safety of its employees and customers, and continues to refine its work processes to adapt to these unprecedented circumstances.

It is impossible to forecast the duration and full scope of the economic impact of COVID-19 and other consequential changes it will have on the Corporation's business and operations, both in the short term and in the long term.
